» for club committees

What your club gets

fpv-race-pits runs race night at the field and gives your club its own website and app. Here is everything in one page.

Live timing

Every lap appears on your club's site and phones the moment it is flown, with the stream next to it.

Results forever

Every race day, heat and lap is kept: standings, records, personal bests and pilot pages.

Your own club app

Members install it from your site: my next heat, live results and notifications. No app store.

Entries and payments

Pilots enter online and pay; the timing laptop pulls the line-up.

Race control from a phone

Permitted officials start and stop races, marshal laps and run the next heat from anywhere.

YouTube built in

Stream once to YouTube: your site embeds it, and every heat gets a Watch again link.

Your team, your rules

Owners, admins, race directors, marshals and a treasurer, each with exactly the permissions you choose.

Pilots spread the word

One-tap race cards for Instagram, Facebook and WhatsApp, and ready-made recap posts for Discord.

What it costs

Everything free for 3 months — Your club starts on Pro with no card. Before the free months end you choose a plan — or stay on Free: your site, live timing and every result keep working.

Free	Your club site, live timing and every result, forever.	`Free`
Club	Entries and payments, Discord, YouTube links, brackets and remote race control.	`US$8.00 / month`
Pro	Everything: AI certificates and art, the cloud race caller, your own domain, several timing stations and Claude.	`US$19.00 / month`

Prices in US dollars. Your site, live timing and every result keep working on the Free plan.

Getting started

1. Create your club at fpv-race-pits.com/start (two minutes).
2. Install the timing app on the race laptop and connect it with a code.
3. Invite your officials and share the club app with members.
4. Race. Everything else happens by itself.
